Position: Mechanical Engineer (*Junior or Intermediate*)

NOVOPRO is a dynamic company offering services in engineering and project management. They assist their clients to develop projects from very early phases up to the production phase in both local and international market.

NOVOPRO is looking for a **Mechanical Engineer** with preferable experience related to the potash industry.

Some of the responsibilities include:

- Produce project deliverables such as reports, equipment specifications and data sheets, and design calculations
- Prepare technical documents for procurement bid packages
- Conduct technical bid evaluations for equipment and prepare recommendations based on specific criteria
- Assist in the development of equipment/plant layouts and general arrangements with vendor supplied equipment submittals
- Provide technical support for business development activities

Requirements:

- Bachelor's degree in Mechanical Engineering
 - Master's degree preferable
 - Language written and spoken: English
-
