

# Western Potash

Saskatchewan, Canada

Western Potash Corp. is a Potash Development Company focused on building Canada's most efficient Potash Solution Mine. Having delivered a Robust Preliminary Economic Assessment, and Positive Pre-Feasibility Study, the Company is working toward the completion of a Feasibility Study at its Milestone Project in Saskatchewan, Canada. The Company has defined a world-class potash deposit and intends to develop the resource in an ecologically sustainable, economically efficient, and socially responsible manner.

In this regard, WESTERN POTASH has engaged AMEC Americas Ltd in Saskatoon to perform a full feasibility study for the techno-economic assessment of a 2,800,000 tonnes of potash per annum solution mining and processing operation, to be located on their Milestone property, approximately 30 km southeast of Regina, Saskatchewan.

NOVOPRO Projects Inc. is engaged as owner's engineer to review, manage and coordinate the feasibility activities.
